

Legacy/Lebanon Intersection Improvement Project

On October 4, 2010, the City of Frisco began a construction project to improve the capacity of the intersection of Legacy Drive and Lebanon Road. The City of Frisco is providing this project update to make citizens and businesses in the vicinity of the project location aware of the project and provide the purpose and schedule for the project.

Project Description

The project consists of:

1. Constructing an additional lane on northbound and southbound Legacy from Warren Parkway to Texas Drive (just north of Lebanon Rd), and on Lebanon Drive from Todd Drive to east of Legacy Drive.
2. Reconstructing the intersection of Legacy Dr and Lebanon Rd. Upon completion, each leg of the intersection will include dual left turn lanes, three through lanes and a right turn lane.
3. Removing the existing bump in the intersection.
4. Median lighting.

The improvements are being completed to improve traffic flow through the intersection.

Construction Sequence

The project will be completed in six phases:

1. Phase 1: Two additional lanes will be constructed on Legacy Dr. and Lebanon Rd. **Phase 1 completed March 11, 2011**
2. Phases 2-5: Each phase will construct one quadrant of the intersection.
Phase 2: Completed April 11, 2011
Phase 3: Completed May 5, 2011
Phase 4: Completed June 6, 2011
Phase 5: Completed July 6, 2011
3. **Phase 6: Traffic will be switched for Phase 6 on Thursday, July 7, 2011**

DURING THE TRAFFIC SWITCH, WE EXPECT INCREASED DELAYS AT THE INTERSECTION. WE RECOMMEND CITIZENS AVOID USING THIS INTERSECTION ON THURSDAY, JULY 7 WHILE WE COMPLETE THE TRAFFIC SWITCH

During Phase 6, traffic on Legacy will be returned to the pre-construction condition with northbound and southbound traffic flowing on opposite sides of the median. Lebanon Road will also be returned to the pre-construction condition with eastbound and westbound traffic flowing on opposite sides of the median. There will be intermittent lane closures adjacent to the median in the construction zone while workers finish the work in the median, which includes the installation of landscaping and street lights. However, there will always be at least two through lanes open in each direction during this phase.

We will continue to monitor the intersection to minimize any delays by adjusting signal timings, as needed.

Construction Schedule

Phase 5:	Begin: 6/7/2011	End: 7/6/2011
Phase 6:	Begin: 7/7/2011	End: September 2011

Citizens may also sign up to receive an email notification when traffic announcements are made. To sign up for email notifications:

- Go to <http://listsrv.friscotexas.gov/default2.htm>
- Select [Sign up for new email list](#).
- Enter your email address
- Select [Communication and Community Affairs](#).
- Click on the [Submit](#) square.
- Select [Press Releases](#)
